

ZZ One Design Racing Black Aramid Laminate

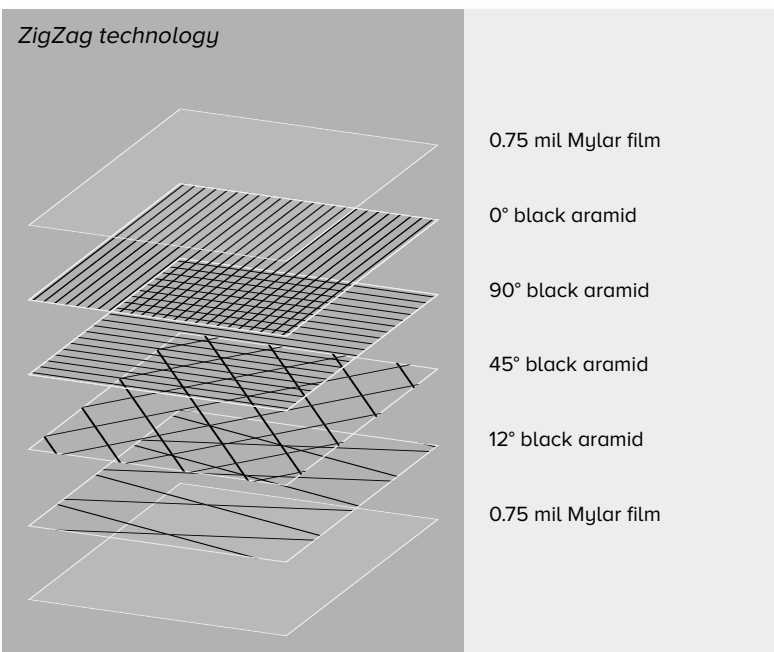

ZigZag reinforced Radial and Cross Cut laminate for the dinghy sailor

Contender Racing laminates are favourites among dinghy sailors from club to international level.

Our **ZZ04 OD Black Aramid laminate** made with **ZigZag** yarn technology enables you to have a sail made of radial or crosscut panels, or a combination of the two styles, to match the modern rigging of your dinghy. The result is fast and durable sails that have proved themselves time and again on the racecourse, thanks to their wide trimming range and the great durability.

Thanks to continuous innovation in collaboration with sailmakers and yachtsmen throughout the world, we have successfully developed a technologically sophisticated range of laminated sailcloths that meet the highest demands of modern sail design.

ZigZag technology

ZZ One Design Racing Black Aramid Laminate

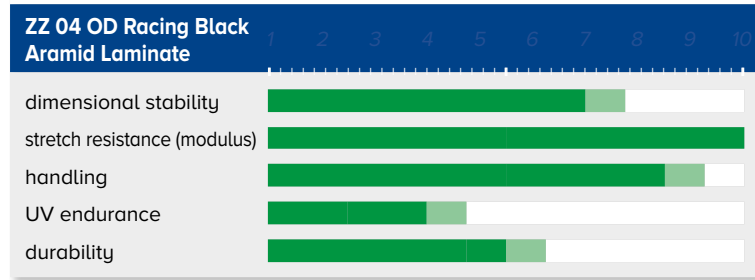

Our **ZigZag** fibre layout ensures efficient support and distribution of the loads over the radial panels in your sail. The effect of this fibre layout is to reduce the load on the Mylar film, helping the sail to retain its shape longer.

45 and 12 degree ZZ support allows cross cut and radial design or combination of both styles.

Black Aramid fibre: great performance combined with good flex and improved UV resistance.
